- On-chain verification: receipt status, Transfer event, recipient, amount
- Rate limiting: 60 RPM per IP + burst 10 (token bucket)
- Credit/refund: avtomatichen pri data fetch failure (90 dni)

4. ENDPOINTS - VSI4KI TOCHKI ZA VLIZANE

4.1 Plateni endpoints (10, 0.10 USDC)

- [1] /api/defi/yields
Top 10 Base DeFi yield pools po TVL
- [2] /api/defi/tvl-movers
Base protokoli s naj-golemi TVL promeni
- [3] /api/defi/lending-rates
Best lending/borrowing rates na Base
- [4] /api/defi/dex-pools
Top DEX liquidity pools na Base
- [5] /api/defi/protocol-safety
DeFi protocol safety scores + risk
- [6] /api/crypto/token-launches
Recently launched tokens na Base
- [7] /api/crypto/token-security
Rug-pull & honeypot detection
- [8] /api/crypto/wallet-profile
On-chain wallet analiz + classification
- [9] /api/crypto/whale-moves
Golemi USDC transfery (whale tracking)
- [10] /api/crypto/bridge-volume
Cross-chain bridge volume to/from Base

4.2 Bezplatni freemium endpoints (2)

- /api/crypto/token-prices?tokens=ETH,USDC
Realni token prices + 24h change (CoinGecko)
- /api/crypto/gas-oracle
Tekusht Base gas price + tx cost estimates

4.3 Bezplatni service endpoints (8+)

- /api - Service metadata + pricing + endpoint list
- /api/health - Live status + current Base block number
- /api/pricing - Transparent pricing: trial, discount, referral
- /api/stats - API usage statistics
- /api/stats/public - Publicni anonymized revenue stats
- /api/sales/recent - Posledni prodazhbi (audit log)
- /api/credits?address=0x... - Proverka na krediti
- /api/openapi.json - OpenAPI 3.1 spec s x402 metadata
- /api/agent/intelligence - Intelligence Report
- /api/agent/recommendations - AI Recommendations

4.4 AI & Discovery endpoints

- /api/ai/insights - AI-genirirani biznes insights
- /api/ai/competitors (POST) - AI competitor analiz
- /api/cron/daily-analysis - Vercel Cron 09:00 UTC
- /mcp - MCP manifest za Claude/Cursor/Windsurf
- /openapi.json - Root OpenAPI (za x402scan)
- /.well-known/x402.json - x402 discovery document
- /.well-known/ai-plugin.json - ChatGPT plugin
- /agents.txt - AI crawler instrukcii
- /agents.json - AI agent discovery (structured)
- /llms.txt - LLM-readable opisane na API-to
- /api/badge - Live SVG status badge
- /api/sales/webhook (POST) - Webhook registraciya

5. Avtonomni Workflows (5 aktivni)

Vsi4ki workflows sa sazdadeni v Base44 i rabotat 24/7:

[1] Kristo Keepalive Ping (Na 10 min)

Pingva /api/health za da dyrzhi Vercel aktiven

[2] Kristo Intelligence Report (Na 6 4asa)

Fetch-va sales/intelligence i prata summary

[3] Kristo Market Scan (Na 6 4asa)

x402 novini, Base DeFi, konkurenti + API health

[4] Kristo Social Post (Dnevno 10:00)

Jivi danni ot API + 2 varianta social post

[5] Kristo Innovation Check (Sedmi4no pon 09:00)

Analizira konkurenti i predlaga novi endpoints

6. AI Monitoring sistema

Vercel Cron se puska vseki den v 09:00 UTC. Chete stats, opitva LLM analiz, ako ne e dostypen - rule-based fallback. Generira 3-5 insights i zapisva v Allnsight tablica.

Rule-based insights (fallback):

- Pricing - ako 0 prodazhbi 7 dni -> namali cena
- Product gap - dobavi governance proposals endpoint
- Positioning - Base vs Solana strategiya
- Growth - free tier za AI agent developers
- Technical - response time tracking

7. Telegram Bot (@kristo_intelligence_bot)

- Token prices (ETH, USDC, Base tokens) | Bezplatno | \$0
- Gas oracle | Bezplatno | \$0
- Token security scanner (rug-pull/honeypot) | Plateno | 0.10 USDC
- Wallet profiling | Plateno | 0.10 USDC
- Whale moves tracker | Plateno | 0.10 USDC

Hosting: Render (background worker). API base: <https://kristo-intelligence.vercel.app>

Sluzhi kato freemium acquisition funnel - bezplatni prices/gas za privlichane, plateno za premium analiz.

8. Marketing (izvyrscheni)

- [v] Post v r/defi - publikuvan (premina self-promo warning)
- [~] Post v r/BASEchain - approval request (pending moderator)
- [] Twitter/X post - drafted (s realni API danni), ne e publikuvan
- [] HackerNews 'Show HN' - drafted
- [] Base Discord - planned
- [v] awesome-x402 GitHub - PR #1081 submitted
- [~] x402scan.com - registraciya planirana
- [~] MCP Smithery - registraciya planirana
- [~] MCP Glama - registraciya planirana

9. Status (km 4 avgust 2026)

Prodazhbi:

- 0 plateni calls
- 0 USDC prihodi
- 0 unikalni wallet-i
- Engine status: warming_up

Konkurenti:

- Poncho (tryponcho.io) | \$0.001-0.005 | DNS greshka
- CoinGecko x402 | \$0.01 | Popularen
- OpenWeb Ninja | \$0.003-0.005 | 40+ endpoints
- x402scan.com median | ~\$0.001 | 700+ APIs

Pozicionirane: Kristo e na \$0.10/call = premium za DeFi specializaciya. Obshtite data endpoints sa \$0.001-0.01.
